

Wave

Acoustic Wall Panel

spinneybeck

**Wave will make a
splash in any space.**

Quieting the chaos, wood ripples along the wall in this powerhouse acoustic system. Linar Flexible Wood available in Baltic Birch Plywood in Natural or Finished covers a highly-effective acoustic box. This acoustic system is comprised of modular panels in varied sizes that assemble in one standard pattern.

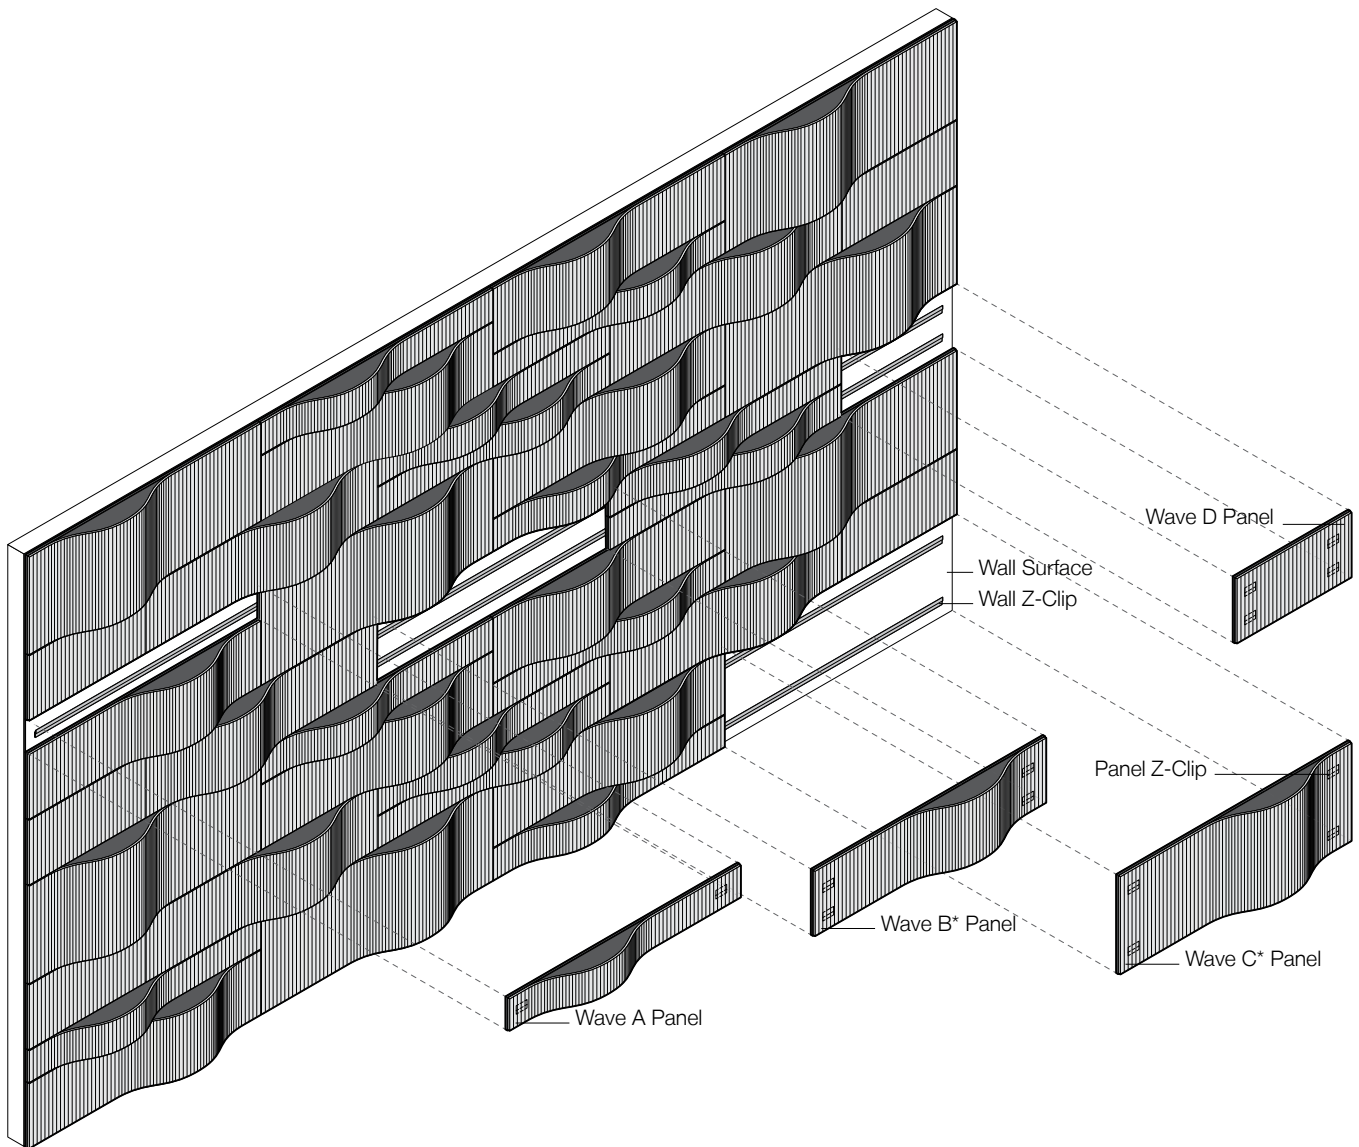

Wave was designed by Bernd Benninghoff, a furniture designer and interior architect based in Mainz, Germany.

“My goal is to develop products that are easy to manufacture and to install — but at the same time generate a strong three-dimensional surface that creates a warm atmosphere and plays with light and shadow.”

– Bernd Benninghoff, designer of Wave
