At commercial interiors company, American Interiors, creating environments that inspire the places we work, learn, heal, and play is core to the team's approach to design. At the entrance to their offices in Tampa, Florida, an eye-catching backdrop in Janus Flexible Wood greets guests at the lobby's front desk. The rich tones of Douglas Fir add warmth to the space, while the incised surface adds a rich texture that draws the eye up. The Flexible Wood panel cleverly divides space and conceals the space's waiting area while allowing light to filter through.
