| Product | Upholstery Leather |
| Leather Type | Hand Tipped (HT) |
| Leather Color | HT 1517 Elkhorn |

At the headquarters of Fossil, the American clothing and accessory brand, the design of the new space needed to meet the classic authenticity established in 1984. At a workplace where teamwork is necessary, huddle areas with Knoll Barcelona chairs are upholstered in a warm, caramel color of Hand Tipped (HT). The two-tone effect of this pebble grain leather is achieved through the base dye coloration and treatment where the tip of the pebble grain is dyed with a dark overtone applied by hand. A light clear coat finish makes this leather durable and relatively maintenance free.
