## Seabrook Island Residence

<b>Specifier</b>	M Peter Inc
<b>Location</b>	Seabrook Island SC
<b>Product</b>	Custom Muro in Leather Weave
<b>Color</b>	LW 2507 Monte Rosa

A residence on Seabrook Island, a quaint barrier island of Charleston, showcases custom features throughout including a colorful, textural headboard in the master bedroom suite. Designed by the Charlotte-based design-build firm of M Pete Inc, the headboard features Custom Muro with a beveled edge in a saturated color of Leather Weave. Leather Weave creates texture by weaving thin strips of upholstery leather in a woven pattern. This unique covering for upholstery and architectural products offers a distinct look and provides a more efficient use of leather as an entire hide can be used to make the product.
